WHY ULTRAFILTRATION IS THE BEST SOLUTION FOR DRINKING WATER

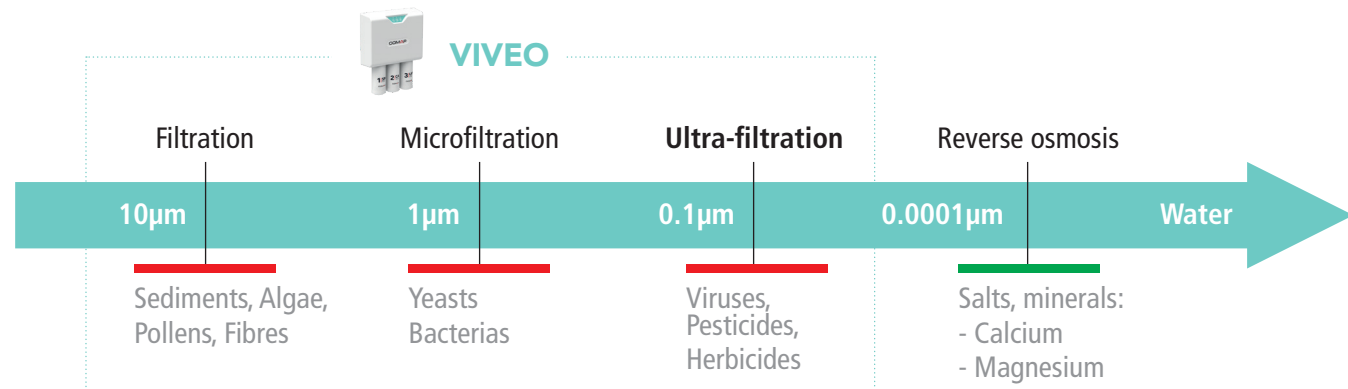

Ultra-filtration is a membrane separation method retaining pesticides, herbicides and bacteria.

A FILTERING SYSTEM THAT RETAINS THE MINERALS IN WATER

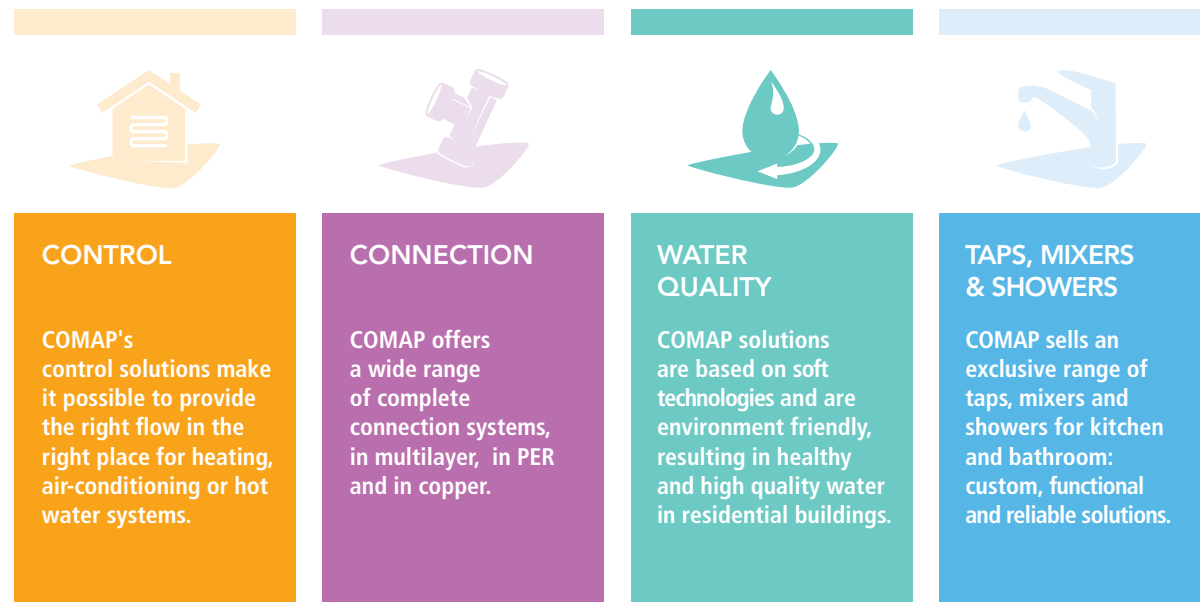

Viveo is an intelligent solution that keeps water components: with a filtration threshold of 0.1µm, it filters out all harmful substances while also retaining good minerals, unlike other solutions that remove them.

DID YOU KNOW?

Tap water contains calcium and can cover up to 25% of daily needs.

OUR FOUR AREAS OF EXPERTISE

To learn more and discover the full range, contact your COMAP sales representative.

COMAP

A leading partner in thermal and sanitary solutions, striving for the comfort and environmental performance of buildings.

French experts for nearly 100 years in the fields of plumbing and HVAC, our solutions integrate harmoniously into living areas.

With nearly 1,000 employees, we design and manufacture control-regulation, connection, water quality and sanitary taps solutions. They enable intelligent management of water and energy and contribute to the comfort and well-being of occupants worldwide.

COMAP is a company of the Aalberts group, which registered turnover of 2.694 bn in 2017.

COMAP

Quality of drinking water by COMAP

SUPPORT INSTALLERS TOWARDS WATER TREATMENT

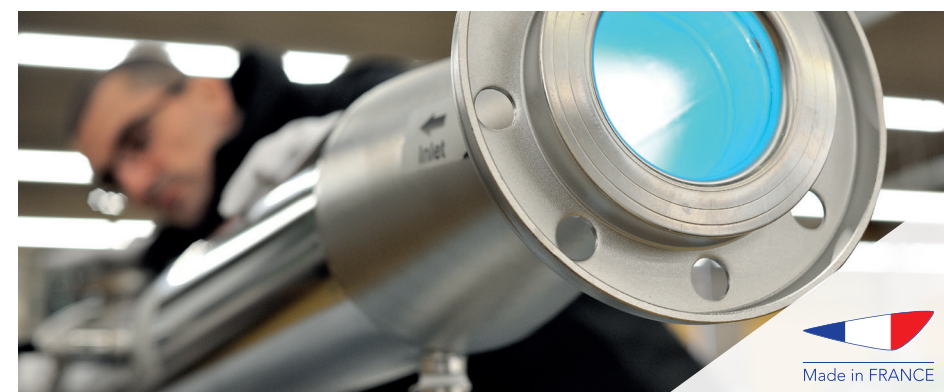

For more than 30 years, COMAP has been designing and manufacturing solutions that improve the quality of drinking water and contribute to the well-being of living spaces.

In order to facilitate installation work, we offer:

- quick installation solutions, without commissioning,
- the complete support of our technical teams,
- availability of our products thanks to our extensive distribution network.

Most water treatment solutions require simple but essential maintenance throughout the life of the appliance. The installation of this type of equipment often provides the opportunity to offer maintenance contracts.

COMAP

Most products in the COMAP Water Quality range are designed, manufactured and tested at the Montélier plant, in the Drôme region, which is ISO-9001 certified.

VIVEO, THE IDEAL SOLUTION FOR OPTIMAL QUALITY

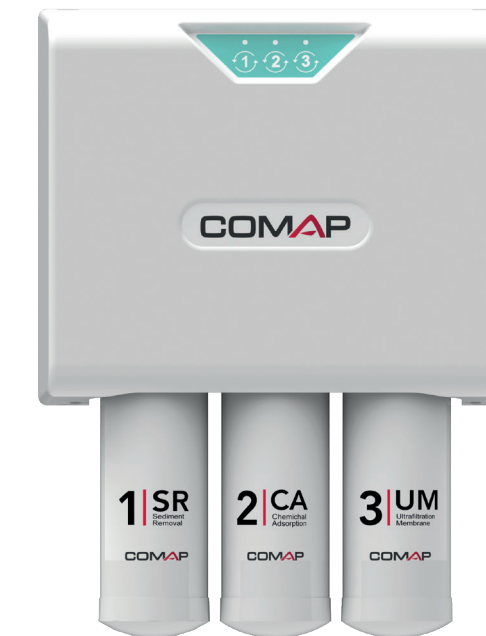

MOUNTING WITHIN AN HOUR

Viveo is a solution to improve the quality of drinking water. Viveo filters water naturally while retaining its original minerals.

Viveo can be installed at the point of use, under a sink for example. The system includes three filtration cartridges to provide high drinking water quality, with no taste. It is installed within one hour. The compact and light structure is easily handled.

Maintenance of the system is very simple: the unit is equipped with indicator lights and an alarm that alert users as soon as one of the filters requires replacement. Cartridges are easily accessible and can be replaced by hand.

Tools are available in a few clicks to guide installers: video, manual, technical datasheet, etc.

THREE FILTRATION LEVELS

1. Sediments and chlorine at 10 µm, with natural activated carbon.
2. Pesticides and herbicides at 10 µm, with natural activated carbon.
3. Bacteria and viruses by ultrafiltration at 0.1 µm on a hollow fiber membrane.

TECHNICAL INFORMATION

On average, cartridges should be replaced once or twice a year for a family of four.
Dimensions : 36 x 27.5 x 9 cm.
COMAP tap: combined with 1-way or 3-way tap (optional).

ADAPTED TO CONSUMERS NEEDS

A special tap must be installed for the Viveo system, as for any advanced filtration solution.

COMAP offers a complete solution with a 3-way tap to install or replace for easier installation and more convenient use.

This solution is a improving the daily life!

A COMPLETE RANGE OF FILTRATION SERVICES

COMAP IS AN EXPERT IN FILTRATION SOLUTIONS

We offer a wide range of washable, single-use or self-cleaning cartridges with the accessories needed for each application.

Each cartridge addresses specific water quality issues such as the reduction of heavy metals, nitrates, pesticides or even bacteria.

KOMEO, TO TREAT HOUSEHOLD WATER

Komeo is a system that prevents scaling and purifies all the water of the household. It detects leaks in the water network.

It is a comprehensive solution, for all household water:

- It protects piping and appliances from scale.
- It removes the chlorine taste.
- It ensures safe drinking water without bacteria, pesticides or heavy metals.
- It controls water consumption and detects leaks in the system.
- It is connected and can be controlled from a smartphone or a tablet.
